DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. This formulation is to be used undiluted in only such portable thermal applicator equipment that can deliver spray particle sizes within the aerosol size range.

FOR OUTDOOR USE ONLY

For small area applications. Hold thermal applicator at least five feet from any object, especially plants and shrubbery. Avoid wetting of foliage. Apply undiluted at the rate of 1 to 2 oz. per 1000 cu. ft. Fog only when there is no breeze, or the wind velocity is less than 3 miles per hour. The ideal time is generally at dusk when the wind dies down and the air temperature and ground temperature are approximately the same. Under these conditions the fog will linger in the treated area for a longer time. Apply fog while moving away from treated area. Keep away from Food, Humans and Pets. Avoid inhalation of the fog. **DO NOT SMOKE WHILE FOGGING.** Do not enter the treated area until the fog has dissipated. Repeat application as necessary.

IMPORTANT: Read the entire directions for use and the conditions of sale and warranty before using this product. If terms are not acceptable, return unopened product container at once.
